

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	
Project Name	A comprehensive measure of well being
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A policy analyst evaluating a highly developed country's human development performance.	Understand how strong life expectancy, education, and income together justify a Very High HDI classification.	Comparing indicators manually across countries is time-consuming and inconsistent.	There is no unified tool that combines all three indicators into a single, reliable HDI prediction.	Unable to quickly and confidently benchmark a country's development status.
PS-2	A policymaker reviewing an emerging economy with moderate development indicators.	Identify which area, healthcare, education, or income, needs the most improvement to raise the country's HDI.	Moderate performance across all indicators makes it hard to pinpoint the biggest gap.	There is no data-driven model that classifies the development level and flags the weakest indicator.	Uncertain about where to prioritize limited policy and funding resources.
PS-3	A researcher assessing a country facing significant developmental challenges.	Evaluate and communicate the severity of the country's human development gap to support intervention planning.	Low life expectancy, limited education, and low income figures are hard to interpret without a standardized score.	There is no accessible ML-based tool to quickly classify and flag countries needing urgent development intervention.	Concerned that critical funding and interventions could be delayed.
