

Demonstration of Proposed Features

Date	6 july 2026
Team ID	
Project Name	A comprehensive measure of well being
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed HDI Predictor solution.

S.No	Feature Name	Description	Status (Implemented/ Partial/Pending)	Demonstrated (Yes/No)	Remarks
1	HDI Category Prediction	Predicts whether a country falls into Very High, High, Medium, or Low HDI category based on input indicators	Implemented	Yes	Core feature; works reliably across all three scenarios
2	Life Expectancy Input & Validation	Accepts life expectancy at birth as an input feature with range validation	Implemented	Yes	Validated against realistic ranges (20-90 years)
3	Education Indicators (Mean & Expected Years of Schooling)	Accepts schooling-related indicators used by the model for prediction	Implemented	Yes	Both features included as per HDI methodology
4	GNI per Capita (PPP) Input	Accepts Gross National Income per capita as an economic indicator	Implemented	Yes	Log-transformed internally for better model performance
5	Interactive Web Interface (Flask)	User-friendly form to input indicators and instantly view predicted HDI tier	Implemented	Yes	Built with Flask, HTML/CSS for a clean and simple UI
6	Data Visualization Dashboard	Charts (Matplotlib/Seaborn) showing indicator distributions and model insights	Partial	Yes	Basic visualizations included; interactive dashboard planned for future scope

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	5 fully, 1 partially
Total Features Demonstrated	6
Overall Implementation Rate (%)	92%
